War is taking any problem exactly as you take a problem of life, stripping it down to its essentials, determining for yourself what is important and what you can emphasize to the advantage of your side; what you can emphasize that will be to the disadvantage of the other; making a plan accordingly — and then fighting just as hard as you know how, never letting anything distract you from the prosecution of that conception.

If, as Services, we get too critical among ourselves, hunting for exact limiting lines in the shadow land of responsibility as between . . . [the Services], hunting for and spending our time arguing about it, we will deserve the very fate we will get in war, which is defeat. We have got to be one family, and it is more important today than it has ever been.

- A-1 Legislative and Regulatory Requirements Impacting Joint Doctrine .... A-2
When a team takes to the field, individual specialists come together to achieve a team win. All players try to do their very best because every other player, the team, and the home town are counting on them to win. So it is when the Armed Forces of the United States go to war. We must win every time.

Every soldier must take to the battlefield believing his or her unit is the best in the world.
Every pilot must take off believing there is no one better in the sky.
Every sailor standing watch must believe there is no better ship at sea.
Every Marine must hit the beach believing that there are no better infantrymen in the world.
But they all must also believe that they are part of a team, a joint team, that fights together to win.

This is our history, this is our tradition, this is our future.

General Colin L. Powell, USA
1. **Joint Publication Hierarchy**

The joint publication hierarchy provides a framework for joint doctrine and joint tactics, techniques, and procedures (JTTP). The organizational structure follows traditional joint staff lines of responsibility to the maximum degree possible. Each series provides for a keystone manual as the first publication in the series. The keystone manuals constitute the doctrinal foundation of the series.

2. **Joint Publication Identification**

a. The first numerical group identifies the functional field as follows.

- **1 Series**: Joint Personnel Publications. Reference publications are also numbered in the 1 Series but do not fall under the keystone Joint Pub 1-0.

- **2 Series**: Intelligence Support of Joint Operations.

- **3 Series**: Joint Operations.

- **4 Series**: Logistic Support of Joint Operations.

- **5 Series**: Planning Joint Operations.

- **6 Series**: Command, Control, Communications, and Computer (C4) Systems Support of Joint Operations.

b. The second numerical group, preceded by a hyphen, places the publication within a functional field. A zero-digit designator is used to indicate the keystone manual for the series of a functional field. For example, Joint Pub 6-0 would be the keystone manual in the C4 Systems series.

c. The third numerical group, preceded by a period, designates those publications that provide supporting or expanded doctrine or JTTP for sequenced manuals within a functional field. An example would be Joint Pub 3-09.3, “Joint Tactics, Techniques, and Procedures for Close Air Support (CAS),” which supports Joint Pub 3-09, “Doctrine for Joint Fire Support,” which falls in the Joint Pub 3-0 series (Joint Operations).

3. **Joint Doctrine Development**

Joint doctrine is regularly reviewed and updated. Information in this publication is correct as of the date of publication. Current status of listed joint publications is available on the Internet at [www.dtic.mil/doctrine/jel/compend.htm](http://www.dtic.mil/doctrine/jel/compend.htm). Additional information on the status of publications currently under development or review can be found in the quarterly magazine “A Common Perspective” which is available on line at [www.dtic.mil/doctrine/jel/comm per](http://www.dtic.mil/doctrine/jel/comm per).
CAPSTONE JOINT WARFARE DOCTRINE

Publications in the capstone series link joint doctrine to national strategy and the contributions of other government agencies and alliances. Joint Pub 1, “Joint Warfare of the Armed Forces of the United States,” lays the foundation for joint operations through doctrine. Joint Pub 0-2, “Unified Action Armed Forces (UNAAF),” provides the basic organization and command and control relationships required for effective joint operations of the forces of two or more Military Departments. The “Joint Doctrine Capstone and Keystone Primer” provides executive summaries of the capstone and keystone doctrine publications.

The conduct of war resembles the working of an intricate machine with tremendous friction, so that combinations which are easily planned on paper can be executed only with great effort. Consequently, the commander’s free will and intelligence find themselves hampered at every turn, and remarkable strength of mind and spirit are needed to overcome this resistance.

As to the military side of the war, there is one lesson which stands out above all others. This is that modern warfare can be effectively conducted only by the close and effective integration of the three military arms, which make their primary contribution to the military power of the nation on the ground, at sea, and from the air.

Fleet Admiral Ernest J. King, USN

In modern warfare, any single system is easy to overcome; combinations of systems, with each protecting weak points in others and exposing the enemy weak points to be exploited by other systems, make for an effective fighting force.

Jointness

Joint and, in many instances, multinational warfare is an American military tradition. Numerous examples which characterize the jointness of warfighting American style fill the pages of our history, from the Revolutionary War to the present.

The defeat of Cornwallis’s army at Yorktown was a combined American and French land campaign supported by the timely interdiction of British reinforcement efforts from the sea by French naval forces. In 1944 American, British, and Canadian naval, air, and land forces conducted the largest shore-to-shore amphibious operation in the annals of warfare, Operation OVERLORD. This invasion of Normandy was the death knell for the Third Reich. As part of what has proven to be a successful free world strategy to contain post-war communism, the Army, Navy, and Marine Corps’s execution of General MacArthur’s masterful plan to turn the flank of the North Korean Army at Inchon is yet another example of joint warfare. More recently, our Armed Forces conducted ELDORADO CANYON in Libya, JUST CAUSE in Panama, and DESERT STORM in the Persian Gulf. All were joint operations and all were highly successful.

In all of these examples, the aim was to coordinate the combat capabilities of the Services and allies or coalition partners to achieve the greatest possible military advantage. This was accomplished through the creation and execution of plans which maximized the unique capabilities of each of the Services. The result was a synergistic force of significantly greater joint combat power than if each Service had been employed individually against the same enemy. Clearly, the idea of joint operations is a natural complement to the pragmatic, team-oriented culture of the United States.
Though the US Military has a rich and successful history of joint warfighting, emphasis on the formal development of joint doctrine is relatively new. Prior to 1986, no single individual or agency had overall responsibility for joint doctrine. As a result, there was no established process for the identification of critical joint doctrine voids and there were no procedures for participation by the combatant commands in the development of joint doctrine. There was also no single agency responsible for ensuring consistency between existing joint doctrine, Service doctrine, multi-Service doctrine, and combined doctrine. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 made the Chairman of the Joint Chiefs of Staff singularly responsible for “developing doctrine for the joint employment of the armed forces.” In turn, this 1986 law generated directives which amplified these new joint doctrine responsibilities given to the Chairman. Figure A-1 is a summary of the legislative and regulatory instruments which currently guide the joint doctrine development process. The magnitude and importance of these changes to regulatory requirements and their impact on warfighting doctrine cannot be overemphasized. Today, Service doctrine must be consistent with that joint doctrine established by the Chairman of the Joint Chiefs of Staff.

**LEGISLATIVE AND REGULATORY REQUIREMENTS IMPACTING JOINT DOCTRINE**

**DOD REORGANIZATION ACT (OCT 1986)**

- The Chairman of the Joint Chiefs of Staff is responsible for developing doctrine for the joint employment of the armed forces.

**DOD DIRECTIVE 5100.1 (SEPT 1987)**

- The Chairman of the Joint Chiefs of Staff is tasked with the responsibility to develop and establish doctrine for all aspects of the joint employment of the armed forces.
- The Chairman of the Joint Chiefs of Staff will promulgate Joint Chiefs of Staff publications (JCS pubs) to provide military guidance for joint activities of the armed forces.

**JCS PUB 2 (DEC 1986)**

- The Chairman of the Joint Chiefs of Staff has overall responsibility for joint doctrine and joint tactics, techniques, and procedures.
- All joint doctrine will be coordinated with the Services, Unified and Specific Commands, and Joint Staff.
- All joint doctrine will be approved by the Chairman of the Joint Chiefs of Staff.
- All joint doctrine and JTTP will be published as a distinct family of JCS publications.
- Each Service will ensure that its doctrine and procedures are consistent with joint doctrine established by the Chairman of the Joint Chiefs of Staff.

Figure A-1. Legislative and Regulatory Requirements Impacting Joint Doctrine
Additionally, joint doctrine is to provide the basis for doctrinal agreements with our allies. Further, the combatant commands that actually employ forces on the battlefield now participate directly in the development of the operational doctrine that will guide the employment of those forces in combat. None of these requirements existed previously. A comparison of the previous methodology for developing joint doctrine and the current system is provided in Figure A-2.

In order to carry out his new responsibilities under the 1986 DOD Reorganization Act, and to improve both interoperability and efficiency, Chairman of the Joint Chiefs of Staff Admiral William J. Crowe reorganized the Joint Staff in early 1987. Pulling resources from throughout the Joint Staff, two new Directorates were formed and staff responsibilities were realigned. Responsibilities for joint plans, training, exercises, evaluation, education, interoperability, and joint doctrine were brought together under a single Directorate — the Operational Plans and Interoperability Directorate, J-7. To specifically focus on managing the joint doctrine development process, a separate Joint Doctrine Division has been established within the J-7. The Joint Doctrine Division is the caretaker of the joint doctrine process and the primary spokesman on doctrinal issues for the combatant commands within the Pentagon.
During the same time frame, a Joint Doctrine Center (JDC) was established under the direction of the J-7. The JDC was charged with assisting in the improvement of the combat effectiveness of the US military forces. This was accomplished, primarily, through the JDC’s analysis and assessment of joint and combined doctrine and tactics, techniques and procedures. Recently, the JDC became a separate division of the Joint Warfighting Center. The Joint Warfighting Center has greatly expanded functions and responsibilities including joint simulations and training as well as joint doctrine.

As a result of these efforts and with the complete involvement of the combatant commands and the five Military Services, great strides have been made in the development and harmonization of joint doctrine. Scores of new joint doctrine projects have been initiated to fill doctrinal voids identified. All of these projects are fully staffed worldwide with the Services and the combatant commands. Milestones are established to synchronize the development of multiple projects simultaneously, and each project is tracked throughout the entire developmental and revision process. The Joint Publication System has been completely reorganized and a new hierarchy of publications has been established. This new hierarchy establishes families of warfighting doctrine and procedural publications linked together by keystone publications. The entire joint doctrine hierarchy is tied together under Joint Pub 1, “Joint Warfare of the Armed Forces of the United States.” A comprehensive, robust joint doctrine development process has also been established and approved by the Joint Chiefs of Staff in Joint Pub 1-01.

The implementation of the DOD Reorganization Act of 1986 has revitalized thinking on joint operations. The direct involvement of the warfighting commands, Services, Service Schools, and Senior Service Colleges has resulted in the creation of an entire body of improved operational doctrine focusing on unity of effort. Every possible contingency where the US military could be involved is being examined to ensure that sound doctrine and procedures exist. Command and control issues, which were previously avoided, are now being addressed in a new light and resolved.
The number of joint doctrine and procedural publications, including ongoing and planned projects, has grown significantly. Though the number of publications can be expected to fluctuate over the next few years, it is envisioned that the total numbers will eventually be reduced as new projects and revisions are completed, consolidating and deleting older publications.

As a world leader, the US military establishment must function as an integrated, efficient team. Militarily, the United States must capitalize on the synergistic effects of cross-Service coordination, thereby realizing the greatest possible combat effect. The existence of sound doctrine capable of coping simultaneously with the challenges of a crisis (and ultimately combat) in a joint operational environment is essential. When the United States considers accomplishing a national aim by force, neither our doctrine nor our equipment can be too good. In such circumstances, the nation sends its sons and daughters to forcibly attain its goals. Military leadership must place the units tasked with accomplishing these goals in the best possible situation. A workable and effective joint doctrine may well constitute the difference between ensuring the well-being of those sent into combat, or risking their loss because of the employment of procedures and tactics which do not optimize the coordinated capabilities of all the Services. In this context, a strong and viable joint doctrine is an essential piece of the nation’s defense tapestry.
